## Notes:

## Source A -

Based on registered births. The base population estimates are unknown. Reported in U.N., 1977, *Levels and Trends of Fertility Throughout the World, 1950-1970*, New York, p. 244.

## Source B -

Based on births tabulated by year of registration rather than occurrence, and female population distributions that are presumably derived from 1966 census data. Rates are as reported in *UNDY 1975*, table 24.

## Source C -

Rates for the Fijian and Indian population only, based on registered births and female population distributions that are presumably derived from 1966 census data. Rates are as reported in Bureau of Statistics, 1976, *Social Indicators for Fiji*, Suva, Issue No. 3, p. 5.
